INTERIOR

Sounds good

Audio experts BOSE created a bespoke sound system specifically for the 350Z's unique interior acoustics. Available with the GT Pack, "the system features seven speakers including a 10-inch subwoofer strategically situated " around the cockpit. The system is programmed to automatically adjust the bass and treble according to the ambient noise inside the car.

Navigation and information

As well as guiding you to your destination the optional Navteq navigation system updates you on traffic conditions and offers alternative routes to bypass jams. Meanwhile the trip computer tells you how long you've been driving, your average speed, even the temperature outside.

More user friendly than ever

The emphasis inside the 350Z is on form and function. An example is the redesigned centre console which is easier to access, thereby improving storage for both driver and passenger. We've even illuminated the cup holders and ignition key lock so they're easier to find at night.

Complete cabin comfort

The heated leather seats on GT Pack help make the 350Z's cabin a cosier place by warming the cushion and backrest when the weather's cold.

Usable boot space

Boasting one of the largest boot spaces of any two-seater coupe, the 350Z is a truly practical sports car. With 235 litres of luggage space – more than some superminis – it has room for a large suitcase or two golf bags with space to spare.

Take your seats, please

There's a wide choice of seat materials for the 350Z COUPE including cloth or leather in Charcoal and new Frost Grey leather on GT Pack. Optional Alezan Orange leather includes the seats, gear knob and handbrake.

EXTERIOR

Style as standard

Close attention has been paid to the design of every detail on the 350Z. From the sweep of the headlamps to the unique contours of the door handles; the twin exhausts sculpted from stainless steel to the wind-cheating wing mirrors. Making the most of this work of art are three new metallic colours: Twilight Grey, Night Blue and dynamic Temper Orange.

Exterior and Interior

Sporty style with substance

Aluminium: the light fantastic

By shedding weight it's possible to improve all-round engine performance. So we've used light yet strong aluminium for the bonnet and suspension. The result isn't just improved acceleration but also lower fuel consumption and fewer exhaust emissions.

18" RAYS rims

Stylish six-spoke alloys from wheel expert RAYS complete the picture. But they don't just look good. Following the overall philosophy of the 350Z they help improve performance too. Each wheel is 4kg lighter than those used on 2005 models.

Twin tail pipes

Exhausts are vital to a car's appearance from the rear. The 350Z's twin tail pipes – one at each corner – sound great and their looks speak volumes about the car.

ENGINE

Pure power

The 3.5-litre V6 beneath the bonnet doesn't rely on turbochargers and superchargers. We wanted to keep it as pure as possible to maximise driver enjoyment. So we applied racing car technology to the new all-alloy engine. The result is a muscular 313PS power plant that pulls strongly in any gear from low in the rev range all the way to the 7,500rpm limit.

Awesome acceleration

The beefy 3,498cc engine has a huge amount of pulling power. It reaches its mightiest at 4,800rpm when it punches out a breathtaking 358 Newton Metres of torque. But there's also plenty of torque lower in the rev range so there's acceleration on tap, whatever the speed.

Clean as well as mean

The 350Z is a sports car with a conscience. By complying with tough Euro IV exhaust emissions regulations its engine expels exceedingly low levels of carbon monoxide, hydrocarbons and other pollutants.

HANDLING & BRAKING

Perfect balance

The 350Z's weight has been deliberately spread to ensure the handling puts a smile on your face. By having 53% of its mass at the front, the car's traction on the turn-in to corners is maximised. Under acceleration out of a bend, weight shifts to the rear, boosting grip to the wheels that transmit power to the road.

In-built stability

Like a single seater racing car the 350Z's wheels have been situated at each corner with the space between maximised. By putting the driver in the middle of this long wheelbase, it allows the engine to be moved back and the fuel tank to be shifted forwards. With the centre of gravity half way between the axles the result is impressive stability at high speed.

Stops as well as it goes

When it came to stopping the 350Z we turned to braking expert Brembo. Its technicians specified lightweight aluminium callipers with four pistons at the front, two at the rear using high-friction brake pads. Working on large diameter ventilated discs, heat is efficiently dissipated to provide fade-free stopping again and again.

Performance

Sports car credentials

Three braking systems in one

When you hit the middle pedal on the 350Z, state-of-the-art systems will bring you to a halt. Electronic Brake force Distribution (EBD) allocates maximum braking to the wheels with the most grip. In an emergency Nissan Brake Assist (NBA) applies extra braking pressure. And the Anti-lock Braking System (ABS) prevents wheels locking so the driver retains steering control.

NISSAN 350Z

Performance

	Fuel consumption (mpg)			CO2 Emission Combined (g/km)
	Urban cycle	Extra cycle	Combined cycle	
3.5 V6 Manual (3 door coupe)	16.8	32.1	24.1	280

In accordance with 2004/3/EC optional equipment, driving technique, payload, road and weather conditions may affect actual fuel consumption.

Safety and Security

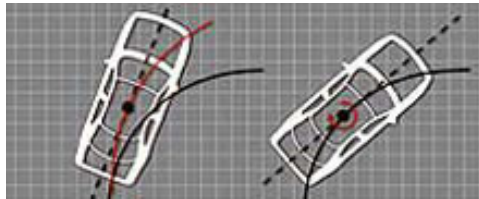

Confidence through safety

ACTIVE SAFETY

Three braking systems in one

When you hit the middle pedal on the 350Z, state-of-the-art systems will bring you to a halt. Electronic Brake force Distribution (EBD) allocates maximum braking to the wheels with the most grip. In an emergency Nissan Brake Assist (NBA) applies extra braking pressure. And the Anti-lock Braking System (ABS) prevents wheels locking so the driver retains steering control.

Electronic safety net

Electronic Stability Program is a safety net for car drivers. Sensors monitor wheel speed and steering angle. If they detect things starting to go awry they cut engine power and brake individual wheels to ensure the driver maintains control. A Traction Control System stops wasteful wheelspin as you accelerate. But if you prefer to rely on your own abilities you can always turn these electronic aids off.

Less slip, more grip

Handling is further improved by a Limited Slip Differential. This sends more power to the rear wheel with the most grip ensuring you've got maximum traction.

PASSIVE SAFETY

Airbags all round

For extra reassurance the 350Z is equipped with front, side, and curtain airbags. This advanced passenger protection system can determine impact levels and deploy the airbag with the minimum force necessary for maximum safety.

Seats and belts that work together

Having the seatbelt tight enough to restrain you but not so tight it injures you is vital to escape a crash unscathed. In the 350Z seatbelt pretensioners and load limiters automatically perform these tasks. There are also active head restraints that deliberately move towards you to limit whiplash injuries.
