NISSAN NEW CABSTAR Performance

Power, agility -- and economy

DRIVING PERFORMANCE

Three efficient engines

All three Cabstar engines have second generation common rail injection systems. And all three provide economy along with reduced noise and high torque at low RPM. The range of 2.5L engines include 110HP/250Nm or 130HP/270Nm, both with a flat torque curve for more engine elasticity. The 3.0L engine, with 150HP/350Nm, has a variable geometry turbo.

A more relaxing drive

With its compact dimensions and small turning circle (10.56m to 13.54m depending on wheelbase), Cabstar is agile enough to take on city streets. Independent front suspension plus powered rack and pinion steering also provide secure handling – and easier driving.

5- or 6-speed gearbox

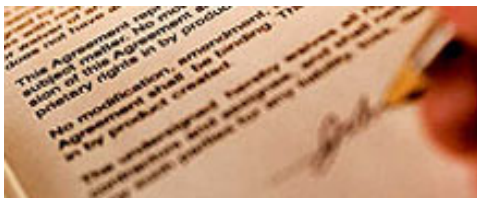

5- and 6-speed manual transmission gearboxes provide ample hill-climbing power, even with full loads. The 6-speed gearbox has a special short first gear for heavy loads and delivers improved fuel consumption on motorway usage.

COST OF OWNERSHIP

Economical engines

Even though they comply with Euro 4 legislation, Cabstar's engines go easy on fuel, consuming 5% less than previous models. So you can go farther with fewer stops.

High residual value

Cost-effective and dependable, Cabstar is protected by extensive anti-corrosion measures, a 3-year/60,000mile warranty and 6 year paint and anti-corrosion warranty. And it's also thieves secure with the engine immobiliser, which ensures the engine won't start without the coded ignition key.

Long service intervals

At 18,000 miles (or 12 months), the new Cabstar's service interval is 6,000 miles more than previous models. So your business can stay on the road longer.

Performance

Power, agility -- and economy

Tilt cab for easy maintenance

Every truck needs maintenance and servicing at some point. Cabstar makes it easy with a tilt cab, standard on all models.

Safety and Security

Brains as well as brawn

COMFORT

Air conditioning

Effective ventilation helps you work better. Cabstar offers the option of air conditioning for an even more comfortable cabin.

User-friendly technology

Cabstar's many options help your workday run smoother. Keyless entry means you can unlock the cabin doors with remote control. Power windows and mirrors are also available, as well as a CD system to make long drives more enjoyable.

On-board computer

The optional on-board computer is packed with useful information: how far you can go on your remaining fuel, accumulated time and distance, tyre rotation – even shift-up advice for optimum gear changes.

Easy Hill Start

Easy Hill Start (EHS) holds Cabstar's brake when stopped on a hill. The system detects the clutch pedal release; when there's enough torque to move forward, the brake is released. So there's no need for the hand brake. EHS can be switched on and off with convenient switches in the cab.

SAFETY

Packed with safety features

Four disc brakes are standard in all Cabstars, and on 3.5T models ABS and EBD (electronic brake distribution) provide optimum braking. A wide windscreen and high driving position

Extra protection

Cabstar now has a reinforced cabin structure, including anti-intrusion bars in the cabin doors to maintain the tough shell's integrity. The cabin is also protected by a sturdy shock-absorbing front bumper.
